

Board and Batten

Board and Batten Panels are ideal for both the residential or commercial application. Available in 32 colors and textures in 28 gauge steel. Vertical metal panel featuring a flat board with a raised batten. Whether used for your entire home or business or simply as an accent, board and batten is sure to provide a unique design to any project.

Benefits

Longevity & Low Maintenance – The paint on our Board and Batten panels is warrantied to be intact at the end of 40 years, plus the metal is protected by primer and a 25 1/2 year galvaume coating. There is virtually no maintenance necessary, no mold, no curling, and no tar streaks.

Environmentally Friendly/Energy Efficiency – Metal panels are made from 20 – 75% recyclable materials and may not need to be replaced for 40 to 60 years. They are 100% recyclable, meaning any waste associated with the installation of our products can be recycled into future consumer goods without harm to the environment.

Cost Savings – The greatest savings on metal siding is over the span of a lifetime; it is very possible that metal panels may last for 60 plus years. There is also money to be saved on energy use, tax credits, and possibly insurance and installation as well.
