

Maintenance-free seamless siding saves money as well as time. To maintain the exterior appearance of your home, seamless steel siding from The Metal Shop eliminates the need for priming, caulking, painting, staining, sealing, or patching. With little to no maintenance, your siding will look freshly painted for years to come.

The Metal Shop Dutch Lap, also referred to as horizontal lap siding, is a popular type of siding. Wherein we eliminate those unsightly splices and joints, and give you a smooth, clean-looking exterior.

Features

Our Dutch Lap siding comes with fully rolled nail hems. It's a unique nail that holds the siding on your wall and ensures resistance to extreme winds. Fully rolled nail hems are widely considered to be the best nails for siding.

Benefits

The Metal Shop Dutch Lap you can have confidence knowing that a limited lifetime warranty protects your home against manufactured defects. Our warranties are the strongest in the industry and you'll have peace of mind knowing your new seamless exterior will retain its beautiful, maintenance-free appearance year after year. Steel siding of The Metal Shop requires virtually no maintenance. You can eliminate most of your annual exterior work with a simple rinse with a garden hose.

STEEL SIDING PAINT FINISH WITH KYNAR 500®/HYLAR 5000® PVDF

Our paint finish consists of multiple layers permanently adhered to a galvanized steel core. These layers feature an extensive coating process that creates color consistency and weather-resistant properties.

1. Solid, High-Strength, Graded Steel Core
2. Galvanized Coating (Front and Back) – Corrosion-resistant, metallic coated steel
3. Pretreatment Layer (Front and Back) – Prepares the bare galvanized steel for high-performance paint coating
4. Corrosion Inhibitive Primer – Applied for metal edge protection and superior adhesion
5. Texture – Proprietary agent for enhanced abrasion resistance
6. PTFE Surface Protector

7. Base Coat (Solid Colors) – Kynar 500®/Hylar 5000® protective coating with Cool Paint Technology™, which includes ceramic infrared reflective pigments
8. Print Coat (Blended Colors) – Kynar 500®/Hylar 5000® protective coating with Cool Paint Technology™, which includes ceramic infrared reflective pigments
9. Clear Coat (Blended Colors) – Kynar 500®/Hylar 5000® protective coating
10. Color-Matched, Moisture-Resistant Enamel Backer Coating
