

The Standard of Strength **5 RIB PANEL**

Versatile Metal Roofing & Siding for
Homeowners and Contractors

The Industry Standard **Perfected**

Contractors call it the 'standard' for a reason. Homeowners choose it for the peace of mind.

The 5-rib panel (also known as Classic Rib, Tuff-Rib, or Ag Panel) is the versatile product designed for fast, efficient installation and long-term value.

BUILT TO HANDLE MICHIGAN WEATHER

COLORS

Available AkzoNobel® Colors

Available Beckry® Tech Textures

**Colors here may appear differently than when seen in-person or in different lighting. *Indicates premium colors.*

BUILT FOR THE LONG HAUL

Strength You Can Count On
Tested to withstand winds up to 150 mph.

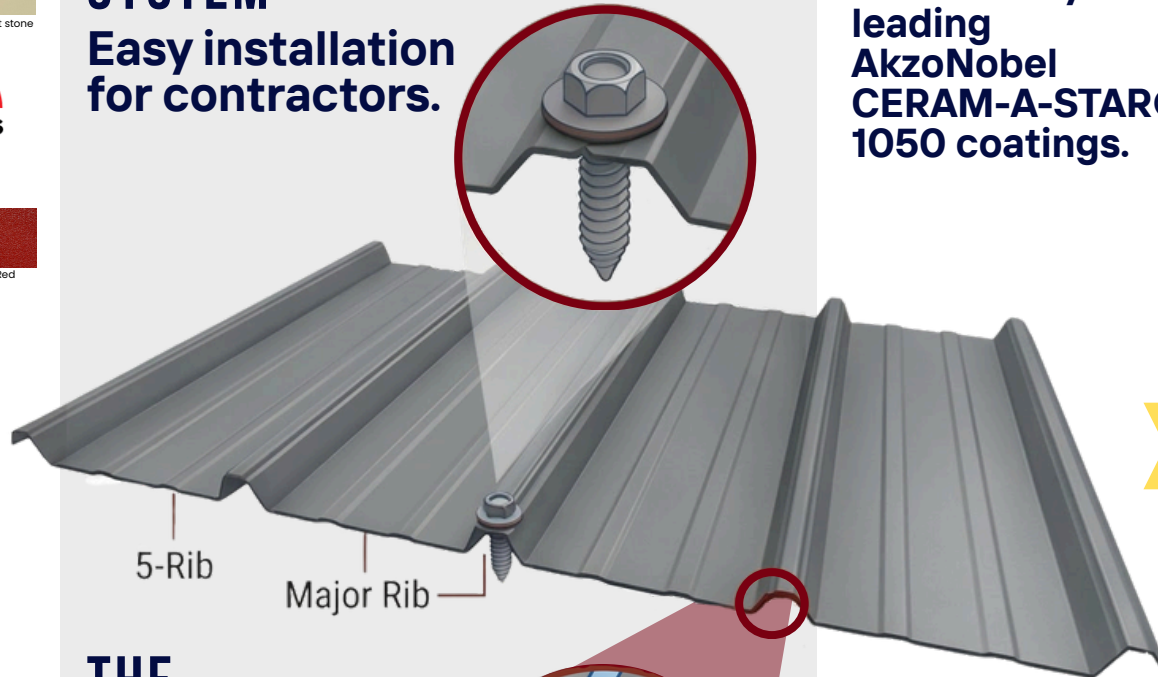

Value Over the Long Run
One of the biggest savings is lifetime performance. It's very possible a properly installed metal roof won't leak for 60+ years.

Reduced Maintenance
Virtually no maintenance compared to asphalt shingles—no curling, no mold, no tar streaks.

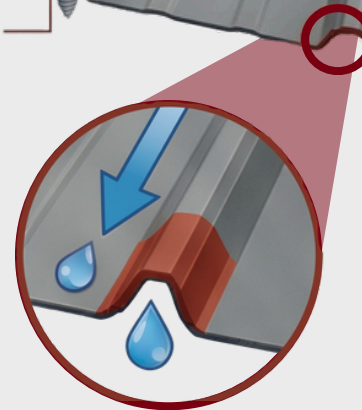

Engineered for Peace of Mind

THE FASTENER SYSTEM
Easy installation for contractors.

THE ANTI-SIPHON GROOVE

Formed groove prevents water from traveling upward at the overlap, drastically risk of leaks in wind-driven rain.

AkzoNobel Performance

Our 5-Rib panels are finished with the industry-leading AkzoNobel CERAM-A-STAR® 1050 coatings.

Quick Specifications	
Metal	28-gauge
Base Metal	Galvalume®
